

2005 – News and Announcements

11/10/2005 – QSV Biologics awards power and control system upgrade to Hinz.

QSV Biologics, a provider of dedicated biopharmaceutical manufacturing has contracted our Edmonton office to upgrade their existing plant power and control systems. Work has already commenced in conjunction with the upgrade of biological reactors and will be completed in early 2006.

Located in the Edmonton Research Park, QSV Biologics is a provider of the following contract services:

- cGMP Microbial Fermentation
- Microbial Process Development
- Mammalian Cell Culture Process Development
- cGMP Cell Bank Storage
- Analytical Development
- Process Scale Up
- cGMP Document Services.

11/01/2005 – Safety Symposium is a Success!

We would like to congratulate everyone involved in making the [Safety Symposium 2005](#) a success. A special thanks to our presenters and vendors.

08/10/2005 – Hinz selected to receive the Work Safe Alberta 2004 Best Safety Performer Award

Based on a combination of safety performance data and an on-going commitment to health and safety, the Alberta government selected Hinz to receive this award.

PHONE: 780-489-8880
FAX: 780-489-8880

05/03/2005 – Hinz awarded Controls/Instrumentation Contract for Expansion at Canbra Foods Canola Processing Facility, Lethbridge

Canbra Foods Ltd. today confirmed plans to proceed with an \$8 million upgrade to their canola seed crushing facility.

The project will increase efficiencies in the initial processing steps where canola seed is conditioned and extraction of the oil takes place. The upgrade will replace 14 major pieces of equipment with six state-of-the-art units.

Headquartered in Lethbridge, Alberta, Canada, with a local staff of over 240, Canbra Foods Ltd. is a 100% Canadian, wholly owned subsidiary of James Richardson International Limited. Parent company James Richardson & Sons, Limited is 148 years old, which demonstrates the company's long-term commitment to Canadian agriculture.

04/15/2005 – Calgary ISA Show

Jonathan Topp of Nexen was the winner of the Hinz Golf Bag from our ISA Calgary 2005 draw.

03/21/2005 – Hinz Presenting at ISA Calgary

Come visit us at the [Calgary ISA Show](#) April 13th and 14th in Booth 929.

We are presenting at the ISA Calgary Technical Conference a paper on "SIL and Risk Assessment" April 14th @ 8:00 AM in the Palomino Room.

03/08/2005 – Hinz is an OBIEC Supporter

Hinz Automation Inc. is proud to be an OBIEC supporter since it's inception in 2003. The OBIEC Stakeholder Advisory and the Canadian Standards Association (CSA) Technical Committee, responsible for the development of the Object Based Industrial Electrical Code, has representation from many stakeholder groups. During February of this year, the CSA-OBIEC Technical Content Subcommittee is meeting to begin the work of writing the code.

The OBIEC will be an Objective Based Code that will provide qualified users with an alternative approach to achieve or exceed Safety provisions of the Canadian Electrical Code Part 1. Safety Objectives will be established in keeping with acceptable worldwide codes and practices and give guidance and direction for suitable designs that fulfill the safety objectives. This code will offer greater flexibility to qualified industrial users by providing the ability to effectively introduce new technologies and installation methods. Further, this code will offer the ability to promote more design creativity, and provide the ability to maintain or improve the safety of industrial plants by ensuring the design will address safety objectives that prevent or reduce injuries.

For further information please see the following OBIEC update dated April 2004:
